

# Shoe Covers

IDEAL FOR MANY APPLICATIONS - A MUST FOR PROTECTING YOUR SHOES OR WORKBOOTS!

MADE IN MEXICO

**SHOE COVERS** made with High Density Latex Rubber. Protect your Work Area from Unwanted, Harmful Elements.

## SHOE COVERS FEATURE:

Summit Glove's exclusive design is manufactured with the tread etched in the mold, unlike other covers where the tread is acid etched. This offers an excellent slip resistance in wet and dry applications and longer wear time. Our newly shaped shoe covers are designed to fit perfectly over leading brand shoes and boots.

- Superior Barrier for Contamination Protection
- Low Cost Alternative
- Applications – Food Processing, General Industrial, Manufacturing, Environmental, Chemical, Agriculture
- Sizes: M, L, XL, 2XL with easily identifiable embossed size indicators

## NOTE:

- It is recommended to visually check the covers for condition intermittently during use.
- Shoe sizes are based on a typical US men's shoe. Different styles (ie: steel toe, extra wides, etc) may require alternative sizes

**Summit Glove**
